WHAT IS SEARCHPETROLEUM.NET?

SearchPetroleum.net is a free vertical search engine dedicated to the oil and gas industry. By only indexing websites that are related to oil and gas, **SearchPetroleum.net** ensures users receive quick and relevant results each and every time they search.

The engine uses unique semantic technology, which interprets the meaning of the word being searched in an industry-related context. This means that search results are more intuitive and reflective of the user's intentions.

SearchPetroleum.net is more than just a search engine. It is a faster and more efficient means of searching for information.

Semantic technology results:

The screenshot displays the SearchPetroleum.net search engine interface. The search bar contains the query "hydrocarbon producers" and a "GO" button. Below the search bar are navigation tabs: GENERAL, NEWS, JOBS, BLOGS, RESEARCH, COMPANIES, and COMPANY DIRECTORY. The search results are displayed in a list format, with the following items highlighted:

The left sidebar shows navigation options for refining by sub-sector (Engineering, E & P, Drilling, Renewables, Offshore, Oil Sands/Shale, Gas/LNG, Refining/Processing, Pipelines, Government, Geothermal, Safety/Training) and by geography (Europe, Canada, Australia, Asia, Africa, South Africa, USA, Oceania, Middle East, UK, South America, Russia).

THE DIFFERENCE

General search engines index billions of pages from millions of websites and return an incredibly large number of search results and information overload. Vertical search solves this problem by dissecting the web of topic-relevant content, indexing only those pages and providing fast, accurate and well-refined information to specialised online communities, in particular business professionals.

E-consulting reported that the ability to find information quickly is the main advantage of vertical search engines from the perspective of business users.¹ Around two-thirds of survey respondents saw the following as the major benefits of vertical search:

- Quicker to find desired information (67%)
- Top results more relevant (65%)
- Focus on specific business interests and workflow (64%)

General search, typified by Google and Yahoo, return results that are keyword relevant but can be contextually meaningless. In fact the average general search failure rate is 31.9%

WHY ADVERTISE ON SEARCHPETROLEUM.NET?

TARGETED MARKETING CAPABILITY

SearchPetroleum.net provides a unique opportunity for advertisers to reach high-spend, mining industry decision-makers around the globe. With search-based advertising, companies can direct their message right at their most relevant eyeball and right at the point that they are looking to buy or find. Gartner reports that 85% of business executives use search engines as their place of choice when they want to find out more about a product or service.²

RETURN ON INVESTMENT

As SearchPetroleum.net delivers your message to a targeted, qualified and captive audience, you can be assured of click-through rates that exceed all other forms of online marketing PLUS the potential for immediate, as well as ongoing sales. One of the great benefits of search engine marketing is measurability. You are able to see exactly how many conversions (online leads or sales) you've received, along with the revenue generated and your ROI. It's every marketer's dream!

INCREASED BRAND VISIBILITY

There's no question that conversions are critical and, fortunately, it's easy for search advertisers to measure the conversions they've generated. It's important to remember, however, that search affects brand-building throughout the buying cycle and it is likely to have an even greater impact on a company's brand, and business as a whole, than can ever be measured.

The positive impact that search has on a brand is increasingly being recognised and valued by advertisers. Companies are now more likely to use search marketing for increasing brand awareness (63%) than for selling directly online (61%) or generating leads (56%).³

BOOK NOW. LOCK OUT YOUR COMPETITORS AND HIT YOUR KEY TARGET AUDIENCE TODAY.

SearchPetroleum.net is extensively promoted on leading news site *PetroleumNews.net*, association websites such as Society of Petroleum Engineers, and through a range of other leading industry publications and events. This ensures traffic is directed to the site and, more importantly, to your products and services.
